# INTRAACTIVE
## CONNECT

Microsoft 365 is a unique platform for communication and collaboration. The use of Microsoft 365 has grown exponentially in many organizations. So has the need for secure communication and collaboration between a company and its subsidiaries.

IntraActive Connect bridges the gap between seperate organisations, providing a safe connection between your Microsoft 365 tenant and those used by subsidiaries or suppliers.

## KEY FEATURES

### RULE BUILDER

The rule builder lets you define your main tenant and lets you choose which users from other tenants to allow as guest visitors.

### EXCHANGE SETUP

Define how users can use calendar sharing and check availability when booking meetings in Outlook.

### USER INFORMATION

Define and configure the AD attributes that users need and use the information for a shared phone book.

### ADDRESS LIST PERMISSIONS

Limit access to address lists for certain users or groups.

### SECURITY VALIDATION

Define decisions and rules for permissions and security, including life cycle and access management.

### COLLABORATION

Assign access to shared ressources across multiple tenants for collaboration and knowledge sharing, like SharePoint team sites.

# CREATE A UNIFIED USER EXPERIENCE

Allow users across Microsoft 365 tenants the same experience. Offer a joint intranet to all users across subsidiaries.

# BREAK DOWN THE WALLS BETWEEN CITY HALL AND LOCAL SCHOOL ADMINISTRATION

Make it possible for administrative staff from the municipality and school staff to collaborate easily. Let them share information on a joint intranet or a collaborative space, while accessing each other's calendars.

## INTRAACTIVE

ADDING MORE VALUE TO COLLABORATION AND COMMUNICATION IN MICROSOFT 365.
