

**IntraActive**  
Intranet

## Meet your users where they are

IntraActive Intranet is a complete intranet solution for Microsoft 365. Our goal is to make it easy for you to reach your users where they are.

With our intranet for Microsoft Teams, SharePoint Online, Mobile App for Smartphones and Info screens, this is within your reach.

### IntraActive intranet lets you...

#### Get everyone involved

Do you also find it challenging to make your colleagues contribute to the newsfeed on your intranet? The democratic news module in IntraActive Intranet makes it easy for anyone to post a news article or do a notification. Filling in the relevant information is intuitive and can be done in just a few minutes. You can use the news module for anything from Corporate News to System Status.

#### Create Content centrally

With our Content Creator you never have to think about where content 'lives'. All you have to decide, is which type of content you want to create. From the Content Creator you can create different types of news articles, events, handbooks pages etc. and if you need an overview of content you need to revise or approve, you can find it here as well.

#### Get an overview of everything

The administration module will bring you insight into all your intranet content as well as the lifecycle status of that content. You can easily manage the global navigation, permissions and targeting settings. And finally, you can easily configure your very own mobile app as well as infoscreen solution. With just a few clicks you can ensure that your Intranet news gets out to your entire workforce.

## Key Features
