

INTRAACTIVE REPLAY

IntraActive Replay lets you design and create physical screens in your organization straight from Microsoft Teams. The digital signage solution is designed for Microsoft 365 and makes it easy for you to share news and other information.

If you struggle to keep employees without computers up to date on news and information, IntraActive Replay is the solution for you.

Strengthen the social glue in your organization and reach all employees with digital signage.

KEY FEATURES

READY, SET, GO...

With IntraActive Replay digital signage setup just got a lot easier. Add new screens in a matter of minutes.

FREE TRIAL

The first screen is free. Find the app in the Teams store and try it out today.

AVAILABLE WHERE YOU ARE

There's no need for installing difficult software - IntraActive Replay is available in Microsoft Teams.

HELP AND GUIDANCE

We guide you on the selection of the proper hardware to match your needs and offer thorough guidance and expert knowledge.

EXTERNAL SOURCES

Show dynamic content from media outside your organization. Show dynamic news updates and RSS-feeds.

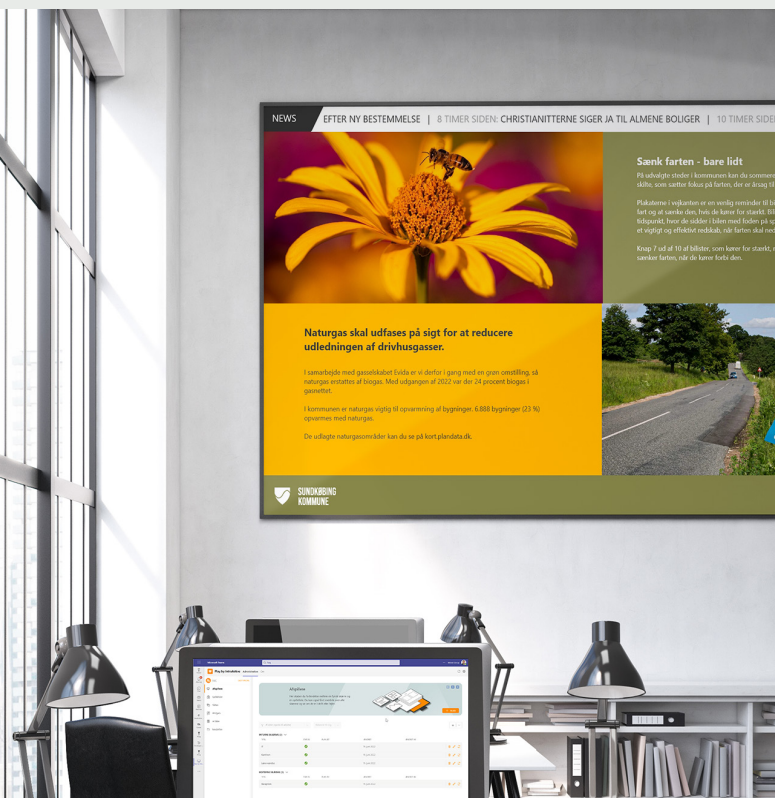

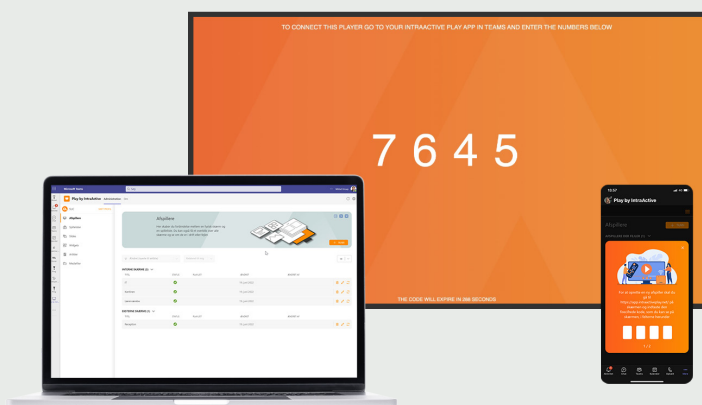

SHAREPOINT INTEGRATION

Connect your existing SharePoint intranet to your digital signage and publish internal news with ease.

GET OFF TO THE BEST START

IntraActive Replay is plug'n'play. Download the app from the Teams store, connect to a physical screen and use our guides to get started. If you already use Microsoft Teams, you can get started with Replay in a matter of minutes. The first screen is free - so why not get started today?

THINK BIG

IntraActive Replay supports playlists, content sharing from your SharePoint intranet and contains the features needed for customizable multiscreen management. If you want a flexible and future proof digital signage solution, try IntraActive Replay today!

INTRAACTIVE

ADDING MORE VALUE TO COLLABORATION AND COMMUNICATION IN MICROSOFT 365.
